PROFESSIONAL SUMMARY

Computer Engineering student specializing in Software Engineering, with practical experience in front-end development, website design, content management, and collaborative software projects. Skilled in building responsive web interfaces with HTML, CSS, JavaScript, and React, with additional experience in PHP, Node.js, MySQL, MongoDB, Figma, and WordPress. Combines technical problem-solving with UI/UX and visual-design skills, and is actively developing knowledge of DevOps practices. Eager to contribute to meaningful projects, learn from experienced teams, and deliver user-focused digital solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React

Backend: PHP, Node.js, Express.js

Databases: MySQL, MongoDB

Design & CMS: Figma, UI/UX design, WordPress, graphic design

Tools & Practices: Git/GitHub, responsive web design, debugging, collaborative development

Developing knowledge: DevOps fundamentals

Professional: Problem-solving, analytical thinking, teamwork, adaptability, organization, communication

EXPERIENCE

Web Development Intern | Dotech Solutions | *2024 | 3 months*

- Designed an e-commerce website interface in Figma, translating wireframes into a structured user interface.

- Implemented website pages and interface elements using HTML, CSS, and JavaScript.
- Applied classroom knowledge to practical website-development tasks in a professional environment.

Web Development Intern | Brand Ades | *2025*

- Gained practical experience using WordPress for website development and content management.
- Continued strengthening web-development skills and familiarity with digital production workflows.

Participant / Project Team Member | Light Share Scholarship Program | *2025–2026*

- Collaborated with team members on a Learning Management System (LMS), an online platform intended to improve access to learning resources.
- Contributed to the development of a team-based software project, building experience in collaborative planning and implementation.

SELECTED PROJECTS

Learning Management System (LMS) | Team Project

- Collaborative education-platform project designed to help users access learning resources online.
- Worked as part of a team to develop the platform; the project strengthened practical skills in software development and teamwork.

Taste Haven | Restaurant Website Demo

- Designed and developed a restaurant website concept featuring food/menu content and a restaurant-focused browsing experience.
- Used HTML, CSS, and JavaScript to practice responsive interface design and front-end implementation.

Laundry Website | Personal Learning Project

- Built a laundry-service website demo to practice React and component-based interface development.
- Used the project as a hands-on learning exercise to improve front-end

development skills.

Restaurants locator platform | Personal project

•Designing a platform for users to discover registered restaurants and explore restaurant details, locations and menus.

•Current frontend work uses React; planned capabilities include restaurant-owner management and searchable listings.

Additional Web & UI/UX Projects

- Created interface concepts and website designs, including Figma-based design work and front-end implementation.

EDUCATION

Bachelor's Degree in Computer Engineering (Software Engineering) — University of Buea | In progress

Higher National Diploma (HND), Computer Engineering — Catholic University Institute of Buea | 2023–2025

Advanced Level (A/L) — Bilingual Grammar School Buea | 2022–2023

Ordinary Level (O/L) — Bilingual Grammar School Buea | 2020–2021

LANGUAGES

English — Excellent (reading, writing, speaking) | French — Intermediate (speaking and understanding)
